*Ships high-performing, scalable web applications used daily by thousands of users; draws on 5+ years of experience in React ecosystems across international markets.*

**Frontend Engineer | React & TypeScript Development | UI Performance & Accessibility | Scalable Component Architecture**

- **Scalable Web Application Development:** Led end-to-end redevelopment of EnjoyTravel's main platform, architecting a modern React/TypeScript codebase integrated with .NET backend and serving 1.5K-3K daily users across 17 languages and 21 currencies.
- **Reusable Component Libraries:** Built and documented 50+ React components with Storybook, enabling maintainable design systems and long-term scalability for multi-product teams.
- **Cross-Functional Delivery:** Partnered with designers and backend engineers to deliver responsive, accessible, and localization-ready UIs; streamlined integrations and reduced bundle size for faster page loads.

| | | |
|---|---|---|
| React Component Architecture | Performance Optimization | CI/CD, Unit & E2E Testing |
| Atomic Design System & Storybook | State Management (Redux, Zustand) | REST & GraphQL Integrations |
| Accessibility & Responsive UI | API Integration & Data Handling | AI-Tools |

## PROFESSIONAL EXPERIENCE

**Frontend Engineer** at EnjoyTravel.com (Remote)                                   January 2024 – August 2025

Frontend Engineer owning architecture, component design, and delivery of EnjoyTravel's primary booking platform. Drove complete frontend redevelopment from the ground up using React 18, TypeScript, and Tailwind, ensuring accessibility and localization across 17 languages and 21 currencies. Partnered with backend (.NET) teams and designers to translate Figma prototypes into scalable, production-ready components.

*Frontend Architecture & Development*
- Led end-to-end rebuild of the search results platform, designing a modern React + TypeScript architecture integrated with a .NET backend.
- Built and maintained a reusable component library (50+ components) with Storybook, standardizing the design system and reducing long-term maintenance cost.
- Optimized bundle size and performance by refactoring components and trimming dependencies, improving load times and contributing to a 25% increase in traffic and measurable revenue growth.

*Collaboration, Quality & Scale*
- Translated Figma designs into responsive, accessible UI and collaborated closely with backend engineers to deliver clean API integrations.
- Solved complex localization challenges (17 languages, 21 currencies, multiple time formats), ensuring consistent UX across regions.
- Improved quality and developer experience through automated testing (Jest, React Testing Library), coding standards, and a scalable repository structure.

**Frontend Developer** at Savvy (Leeds, UK)                                   February 2021 – January 2024

Delivered software solutions for a global client base, creating websites, web applications, UI components, and marketing assets for campaigns. Balanced independent execution with team collaboration, adapting weekly to new projects and industries while modernizing codebases and ensuring responsive, accessible experiences.

*Frontend Development & Client Delivery*
- Developed React and Vue.js components for diverse clients, migrating legacy code and implementing forms, animations, and UI flows to support marketing campaigns across multiple geographies.

- Contributed to dozens of client deliverables across industries, from HTML email campaigns to advanced UI/UX enhancements, consistently meeting tight deadlines.

*Creative & Immersive Web Experiences*
- Delivered 3 high-profile 3D web projects using Three.js and Blender, creating immersive product showcases with interactive and VR-enabled features.

*CMS & Content Enablement*
- Integrated WordPress with React as a headless CMS, enabling non-technical teams to manage content independently and significantly improving publishing turnaround time.

**Junior Frontend Developer** at Kresky (Remote)                          January 2020 – February 2021

Collaborated with clients across Poland, Austria, and Spain to enhance company websites and online presence. Focused on improving readability, user experience, and discoverability while delivering tailored frontend solutions.

- Built and optimized responsive websites using JavaScript, CSS, and HTML, ensuring accessibility and cross-browser performance for international clients.
- Partnered with senior designers to implement modern UI features, helping client sites stand out in competitive markets and attract wider audiences.

---

## EDUCATION & PROFESSIONAL DEVELOPMENT

**Licentiate Degree in Tourism and Recreation,** Uniwersytet WSB Merito, Toruń (October 2013–September 2017)

**Advanced CSS and JavaScript projects**, Udemy (2020)
**The Complete Web Developer in 2021: Zero to Mastery**, Udemy (2021)

---

## TECHNICAL SKILLS

**Frontend Development:** React 18; Vue.js; Next.js; JavaScript (ES6+); TypeScript; HTML5; CSS3; SCSS; Tailwind CSS; Material UI; Styled Components; Storybook; Vite; WordPress (headless CMS); Zustand; Responsive design; Accessibility.
**Backend Development:** Node.js; Express; Mongoose; REST APIs; GraphQL.
**Databases:** MongoDB.
**Systems & Tools:** i18n; Performance Optimization; AI Tools; Figma.
**QA:** Git; CI/CD Pipelines; Gitflow; Unit Testing; Integration Testing; End-to-End (E2E) Testing.
**Methodologies:** Agile; TDD; DRY; KISS; SOLID; Systems Thinking; Atomic Design; CQRS.
**Languages:** Polish – Native; English – B2.
